Post Op Instructions Following IV Sedation

- Go home and rest for the remainder of the day.
- Do not perform any strenuous activities.
- Do not attempt to eat a heavy meal immediately. If you are hungry, a light diet should be adequate. Drink plenty of fluids to keep hydrated.
- A feeling of nausea may occasionally develop after sedation. Lay down until you feel better.
- Do not drive a motor vehicle or perform any hazardous tasks for the remainder of the day, even if you believe you feel fine.
- Do not consume alcoholic beverages for 48 hours following dental treatment.
- Patient may need assistance by a responsible adult while walking and using the restroom.
- Patient shall have a responsible adult stay with them and monitor them for at least 6 hours or until they recover the morning following their appointment.
- Drugs such as Tylenol, Advil, or Motrin are usually effective for mild pain and fever that may follow your surgery and anesthesia.
- If you have any unusual problems, please call the office at 440-333-3766
